Compact washing tunnels for small and medium productions

D Series

The most versatile washing tunnels by Mimasa

The D Series washing tunnels have been designed following the same goals as the other washing equipment: to guarantee hygienic results in the cleaning process: wash, sanitize and dry. D Series are designed keeping in mind easy assembly and installation: plug and clean. They are the compact solution for small and medium washing needs, ideal to be installed in narrow places, as they optimize the space and consumption,

With a brand-new design, we have provided this series with excellent accessibility to the washing area and to the tank, making the cleaning and maintenance tasks far easier.

- Great accessibility. More than 2m width doors
- Lateral tank to enable good access for cleaning
- Elimination of 90 ºangles, corners and retention points to allow water flow.

mimasa® Technology

Hygienic Design
Systems designed to guarantee the hygiene in all the processes: washing, sanitizing and drying.

Plug & Clean System
Tunnels designed to be easy to assembly and to install. We reduce travel, carbon footprint and time.

Spare parts all over the world
Mimasa only uses first world-class brands, to ensure that they are available at any corner of the world.

THE BEST ACCESSIBILITY IN THE MARKET
More than 2m width doors

PERFECT BALANCE BETWEEN POWER AND CONSUMPTION
Highest cleaning quality. In Mimasa we care about the energy consumption. We only use the minimum required energy

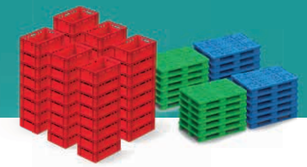
EASY TO CLEAN
Lateral tanks to enable an easy access for cleaning

MAJOR DURABILITY, MINOR WEAR
Stainless steel Vs Plastic. All the Mimasa equipment is totally manufactured in AISI304:
- Transport chain
- Nozzles
- Electrical cabinet

Totally **STAINLESS STEEL**

Possibility to wash different elements:
Crates, trays, molds, pallets, totes, buckets, boxes

From 50u/h up to 1.200 u/h



D Series

Compact · Great accessibility
Lateral tanks · Stainless steel vs plastic
